Summary

Full Stack Developer specializing in ASP.NET Core and Angular, with a strong focus on backend development using C#.
Experienced in building real-world systems including e-commerce platforms, API integrations, and management systems. Skilled in designing RESTful APIs, implementing authentication, and working with SQL Server and Entity Framework Core.
Passionate about building clean, maintainable systems and continuously improving my development skills.

Skills

ASP.NET Core · C# · SQL Server · REST APIs · Entity Framework Core · AutoMapper · Angular · Git · SOLID Principles

Experience

E-Commerce System 10/2025 - 11/2025

- Developed a full-featured E-Commerce platform with Admin Dashboard and role-based access control , built using ASP.NET Core MVC, Entity Framework Core, SQL Server, and Clean Architecture.
- Implemented a complete Admin Dashboard for managing Categories, Products, users, images, and system settings with secure role-based access.
- Built fully dynamic Category & Product Management with image upload, validation, soft delete, and real-time updates using AJAX.
- Designed a responsive Admin UI using Bootstrap 5 and jQuery, including modals, tables, status toggles, and edit/delete actions.
- Developed a secure login system with ASP.NET Core authentication.

Vehicle Finder Web Application 08/2025 - 08/2025

- *Technologies: ASP.NET Core Web API, Angular, Entity Framework Core, SQL Server*
- Built a full-stack application that integrates with external APIs (NHTSA) to fetch and display vehicle data in real time.
- Developed backend RESTful APIs with ASP.NET Core and consumed multiple **endpoints** for vehicle types, makes, and models.
- Implemented frontend in Angular to fetch and display data dynamically using HTTP Client and data binding.
- Used Entity Framework Core for handling data and followed clean architecture practices (Services, Repositories)

Product Storage System 01/2025 - 02/2025

- Technologies Used: **ASP.NET Core, Entity Framework Core, SQL Server, AutoMapper, Angular, TypeScript, Bootstrap**
- Developed a **full-stack** product storage system using **ASP.NET Core** for the backend and **Angular** for the frontend.
- Implemented CRUD operations for product management, warehouse tracking, and supplier handling.
- Used AutoMapper to map between DTOs and domain models, improving code maintainability and reducing manual mapping.
- Integrated with **SQL Server** for persistent data storage and ensured data integrity.
- Used **Postman** for API testing and validation.

Pet Vet Clink 11/2022 - 06/2023

- Technologies Used: **.NET Core, Angular, SQL, HTML, CSS**
- Developed a **clinic management system** for veterinary clinics to streamline **appointment scheduling, patient records, and treatment tracking**.
- Designed and implemented an intuitive **Angular-based frontend** to enhance user experience.
- Designed and developed RESTful APIs using .NET Core to handle appointments, patient records, and treatments efficiently.

USA

Work and Travel to the USA - EXPERIENCE ABROAD (USA) 2022

- Worked in a customer-facing role in the USA, improving communication and adaptability.

Education

The Hashemite University Al Zarqa

Degree and Field of Study 09/2019 - 02/2024

- I have a bachelor's degree in Business Information Technology in 2024 February
